PROFESSIONAL SUMMARY

I am a B.Tech graduate in Artificial Intelligence and Machine Learning with a strong foundation in software engineering, web development, and AI/ML. I completed my internship at Cognizant as a Programmer Analyst Trainee, where I gained hands-on experience in .NET Full Stack development with Angular, worked collaboratively on the HealthNet project, and followed Agile methodologies using Scrum and Jira. I enjoy building scalable applications, exploring AI technologies, and continuously learning modern tools to deliver impactful software solutions.

EDUCATION

Qualification	Institute	Score	Year
B.Tech CSE (AI & ML)	Graduated	CGPA: 9.24	2026
Class XII	Sri Amogha Junior College	986 Marks	2022
Class X	Covells High School	10 CGPA	2020

TECHNICAL SKILLS

Languages: Python, C#, Java, JavaScript, SQL | Frontend: Angular, HTML, CSS, Bootstrap | Backend: ASP.NET Core, Flask, PHP | Database: SQL Server, MySQL | AI/ML: Machine Learning, Gemini API | Tools: Git, GitHub, Jira, Agile, Scrum

INTERNSHIP EXPERIENCE

Programmer Analyst Trainee – Cognizant (Jan 2026 – May 2026)

- Completed training in .NET Full Stack (C#, ASP.NET Core, Angular, SQL Server and REST APIs).
- Contributed to the HealthNet healthcare application in a collaborative Agile environment.
- Worked with Jira for sprint planning, task tracking and issue management.
- Gained exposure to software development lifecycle, code reviews and team collaboration.

PROJECTS

HealthNet – .NET Full Stack

Developed a healthcare management platform for patient registration, appointment scheduling, medical records, symptom reporting and laboratory management. Built using C#, ASP.NET Core, Angular, SQL Server and REST APIs while following Agile/Scrum practices with Jira.

Medibot – Generative AI

Built an AI-powered healthcare assistant using Flask, Streamlit and Google Gemini API. Supports symptom guidance, multilingual interaction, voice input/output and image-based health queries with evidence-based responses.

Insurance Product Recommendation

Designed a machine learning recommendation engine that analyzes customer profiles to suggest suitable insurance plans. Performed data preprocessing, feature engineering, model training and evaluation using Python.

FinTracker – Full Stack Web Application

Created a personal finance management system using PHP, MySQL, Bootstrap and JavaScript. Features include secure authentication, income and expense tracking, budgeting dashboards and financial analytics.

CERTIFICATIONS

- Generative AI Virtual Internship Program – Skillible (AICTE)
- AI-ML Virtual Internship – AICTE
- Cyber Security Virtual Internship – AICTE

LEADERSHIP & VOLUNTEERING

- National Service Scheme (NSS) Volunteer (Aug 2023 – May 2026) – Participated in community service, awareness drives and social impact initiatives.

LANGUAGES

English, Hindi, Telugu
